Color

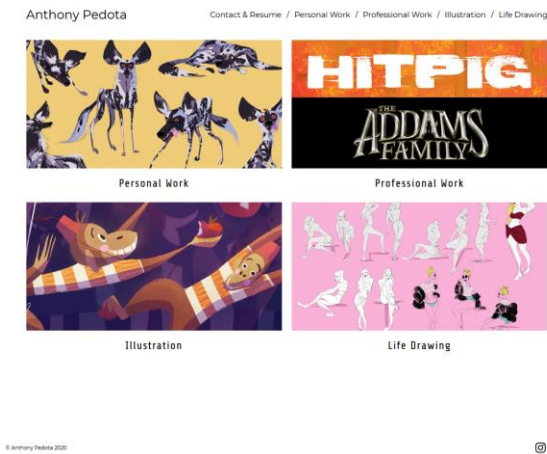

<https://fernandafrick.carbonmade.com/projects/7206604>

I want to have soft colors for the background and most likely only use one or two colors while using a few shades of those to keep the page simple and easy to look at

Typography

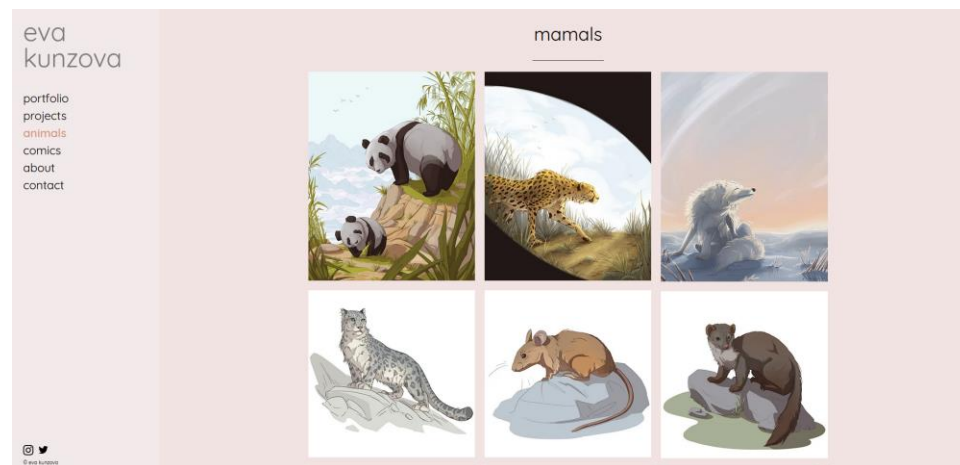

<https://anthonypedota.carbonmade.com/>

I would like to use a clear and big font like Share Tech

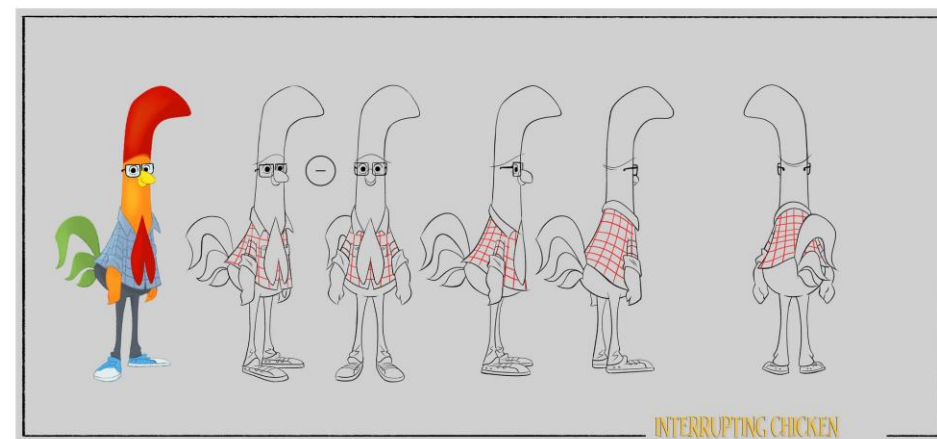

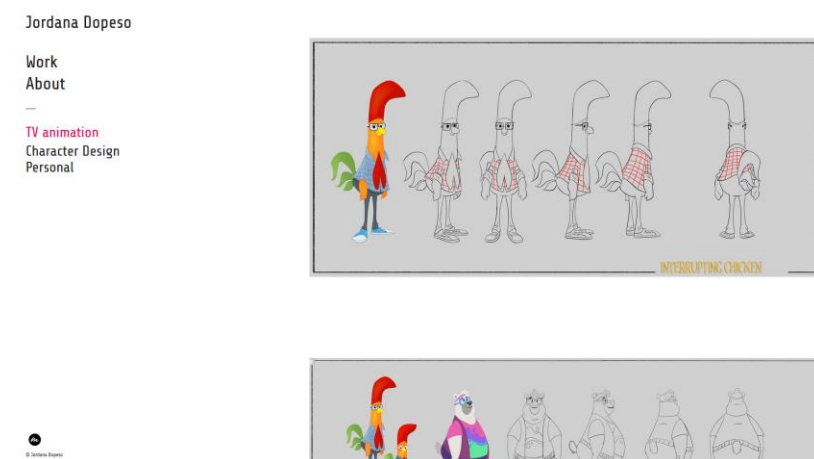

layout (grids)

<https://evakunzova.carbonmade.com/48>

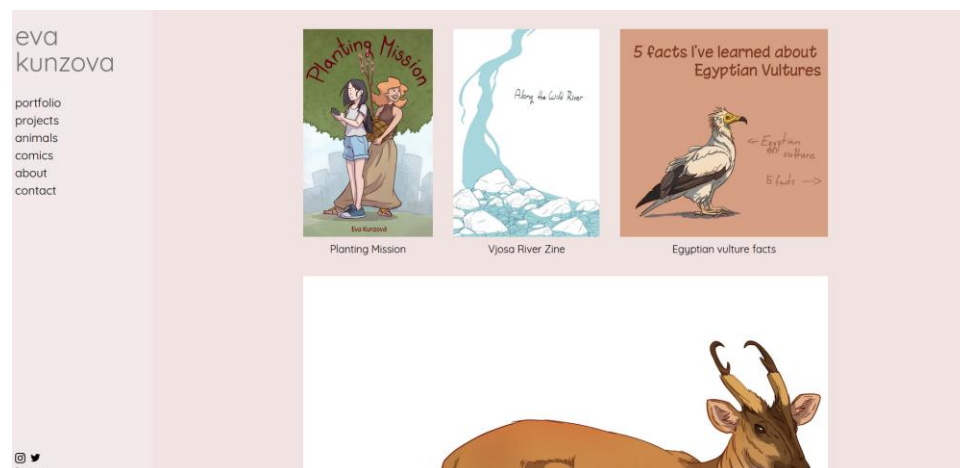

I am a big fan of the layout of the pages in this site. I like having all the art works be in a big feed like instagram and letting you scroll through while seeing them.

<https://jordanadopeso.carbonmade.com/1-1>

This portfolio has a similar layout, but I like how you can click on an image and have it resize into the entire page

Navigation

Having the nav bar on the side gives the page more focus on your work and there's nothing outside of the nav that's distracting from the contents of each tab

I also really like having all the different genres of things Projects, comics etc) be separated instead of all of it bundled together.

I don't want the nav bar at the top of the page because I want it to stay with you as you scroll without blocking the art at the top.
